Skills

Languages: C, Python, Java, Javascript, PHP,Html,CSS,Typescript,Dart
Technologies:Angularjs,Spring,Symfony,Nodejs,MySQL,Oracle,UML,Git,Tailwind css,Bootstrap,Flutter,Matlab

Projects

Small workers website
Java-Spring-Tailwindcss,Mysql,Angular   2021-2022
• Developed a Small Workers Website using Spring, Angular, and Tailwind, introducing a user-friendly interface and integrating innovative features for task management, scheduling, and communication.

Students Management System
Integration Project - Class   2022
• Created a Students Management System using **Spring**, **Angular**, **CSS**, and HTML. Developed a platform that allows students and professors to access daily schedules and enables the director to publish class schedules and announcements. Implemented a grading system for professors to enter and for students to view their exam scores.

Ecommerce Website
Angular - Class   2021
• Developed an e-commerce website during my first year, leveraging Angular and CSS to apply the foundational skills I acquired. The website featured user-friendly interfaces, product listings, and an interactive shopping experience.
